Grateful for Building Futures

My name is Yohana, and I want to share my story. We are a Peruvian family of four, including my two wonderful children and my husband. We moved to this beautiful valley 10 months ago. Through our experiences and challenges, I have seen amazing events happen.

When we first arrived, we had no place to live along with many other needs. We were introduced to Mauricio from the Building Futures program. He helped us find Kathy, our new landlord. She is a wonderful human being who also has given us a hand to move in, making us feel secure and happy. Mauricio also guided us and supported us with many other resources needed to move forward and thrive. My 13-year-old son, who is autistic, now learns to ski with Small Champions, and my 18-year-old daughter volunteers as an interpreter in English classes at school.
